

Agriculture Climate Tools Workshop

Today's weather isn't your grandparents' weather.

Growing seasons are shifting—storms, floods, droughts, and wildfires are becoming more common.

Connect with agricultural climate experts, explore resources, and discuss real-world scenarios at a climate smart farming workshop. Leave with a better understanding of local growing conditions and weather monitoring tools, and feel confident planning for crop planting, fertilization schedules, irrigation, and more for the 2024 growing season.

The workshops are free and include lunch. The workshops are open to specialty growers, commercial agriculture, horticulture, and landscape professionals, as well as Natural Resources Conservation Service and Soil and Water Conservation District personnel.

CEU credits available for Certified Crop Advisors.

Workshops

8:30 AM – 2:30 PM

February 26

Marion County Extension Office
